

NANOTEX® COOLEST COMFORT

Keep your fabric cool when life heats up with Nanotex Coolest Comfort:

Nanotex Coolest Comfort uses hydrophilic net architecture that works at the molecular level of your fabrics fibers to **quickly disperse and evaporate moisture throughout the fabric**. This **advanced moisture wicking** allows the fabric to automatically adjust the microclimate temperature between the skin and fabric, keeping it breathable and cool.

PROPERTIES:	FIBER TYPES:	APPLICATIONS:
Pulls moisture away from skin	Cotton	Activewear
Moisture evaporates faster	Rayon	Apparel
Durable up to 30+ home launderings	Polyester	Bedding
Retains fabric softness	Nylon	
PFAS free		

TEST METHODS:	COMPATIBLE WITH:	CONTACT:
AATCC TM 79	 RELEASE (For Synthetic)	services.technical@nano-tex.com
	 WRINKLE DEFENSE	1.800.CRYPTON
	 FRESH PROTECT	nanotex.com
	 DRY INSIDE	
	 WICK+BLOCK	

We pioneered nanotechnology enhanced textiles.

Nanotex is the original and trusted source that transforms your fabric to better withstand the effects of nature and enhance your life.
