TRENDS & ANALYSIS ON TEXTILE DESIGN AND INNOVATION

TEXTILEINSIGHT.COM

LET'S MAKE A DEAL

Nano-Tex introduces Aquapel, a highly effective and economical approach to water repellency that is completely fluorocarbon free. According to Nano-Tex, a leading fabric innovation company providing nanotechnology-based textile enhancements, Aquapel replaces the traditional fluorocarbon polymer with a hydrocarbon polymer which is both more ecologically friendly and economically smart. It offers the same performance – liquid repellency that's breathable, durable, and fast drying – at less cost, while remaining both fluorocarbon free and PFOA free.

THE PRICE OF INNOVATION
